PROFILE

3rd-year Software Engineering student at Belgium Campus iTversity in Stellenbosch. I build web apps and native Windows software, and I do freelance client work. Looking for an internship or a 4th-year workplace placement (2027).

EDUCATION

Bachelor of Computing - Software Engineering stream (NQF 8) 2024 - present

Belgium Campus iTversity, Stellenbosch Campus

3rd year (2026), expected completion 2027. The degree is 3 academic years plus a full 4th year of workplace training and a dissertation. Current modules include Software Engineering, Programming, Web Programming, Database Development, Machine Learning, Project Management and Research Methods. Second-year average of 75%, with distinctions in Statistics (86%), Innovation & Leadership (85%), Mathematics (83%) and Information Systems (81%).

BCom Information Technology (started) 2023

Stellenbosch University

Started a BCom in IT at Stellenbosch University, then left to transfer to Belgium Campus for a more practical, code-focused software engineering programme.

National Senior Certificate 2022

Midstream College, Pretoria

Bachelor's degree admission pass. Computer Applications Technology 81%, English 81%, Information Technology 74%.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, C++, C#, Python, Java, HTML/CSS

Web: React, Next.js, Tailwind CSS, Supabase, REST APIs, SQL

Systems: Native Windows apps (C++, DirectX 11/ImGui), licensing and auth flows, reverse engineering with IDA

Tools: Git, Visual Studio, AI-assisted development (Cursor, Claude Code)

EXPERIENCE & PROJECTS

Independent project - Pure Optimizer Jun 2026 - present

pureoptimizer.com

- Windows tuner with one-click profiles for gaming, creative work, Office and low-end PCs, plus rollback, GPU and startup tools.
- Storefront and admin in Next.js, React, TypeScript and Supabase, with license keys, subscription durations and reseller tooling.
- Native C++ Windows client (DirectX 11/ImGui) for login, HWID-bound keys, and authenticated download of the optimizer.
- Built and run the full stack myself next to my studies: web app, desktop client, licensing and support.

Web Developer - JW Wellness (freelance) Client project

jw-wellness.net

- Built the live website for a registered wellness counsellor: design, responsive layout and enquiry/contact flow.

ADDITIONAL INFORMATION

Languages: Afrikaans (home language), English (fluent)

Interests: Mountain biking, surfing, coffee (competent barista)
